

# NIHARIKA MISHRA

Product designer and former software engineer who builds internal people and talent products end to end, from research through shipped, high-fidelity experiences. Designed enterprise performance, calibration, and feedback systems used by 70,000+ employees, and prototyped AI-first products in code.

## EDUCATION

Bachelor of Science in  
Computer Engineering

Rutgers University - New  
Brunswick | May 2019

## SKILLS

Product design · Interaction  
design · AI-powered product  
design · Prototyping · SaaS ·  
A/B testing · Analytics-driven  
insights

Team leadership · Enterprise  
platforms · Cross-functional  
alignment · Executive  
communication · Strategic  
product influence

Figma · Codex · Claude Code ·  
Optimal Workshop · Python ·  
HTML/CSS · APIs · Data  
systems

## PERSONAL BUILDS

**Bloom**: a compatibility  
product, designed and built  
end to end with Claude Code  
**Time Tracking Dashboard**: a  
self-built tool exploring how  
AI-first tools reshape the  
design-to-ship loop

## WORK EXPERIENCE

### Design Manager | Capital One

June 2025 - Present

Leading design for onboarding millions of banking customers migrating from Discover, previously the talent platform lead

- Shaping how millions of Discover customers experience becoming full Capital One banking customers, balancing trust and clarity through a high-stakes migration
- Previously, led a team of 4 designers to redesign the people-leader talent-review experience, collapsing a 10-screen, table-based flow into a holistic per-person view, leading to a **76% efficiency gain** for people leaders
- Improved trust and confidence in the enterprise performance platform, driving a **+70 NPS** and a **57% increase in people-leader satisfaction**

### Principal Designer | Capital One

July 2023 - June 2025

Lead product designer for the calibration ecosystem within PATH, Capital One's first enterprise performance platform

- Owned design of an end-to-end, **0-to-1 talent product**, scaling from an **800-person pilot to 70,000+** employees across business lines
- Led **user research** and **A/B testing** to uncover behavioral insights, translating findings into design principles that informed platform evolution
- Built an auto-generating session system matching the structure used in 87% of prior calibrations; **86% of HR partners reported reduced escalations**

### Senior Designer | Capital One

June 2022 - June 2023

Designed the 360-feedback experience that helped make the case for an in-house talent platform

- Led foundational research to reframe a distrusted 360-feedback process into a system people trusted enough to act on
- Designed anonymity and comparative-scale interactions that drove **+65% clarity**, **+58% quality**, and **+52% actionability**
- Research and design principles helped justify building the in-house platform that became PATH

### Data Engineer | Capital One

Aug 2019 - May 2022

Engineer for U.S. Card's customer management platform

- Built batch pipelines and real-time APIs powering credit-card decisioning and analytics at scale
- Improved data reliability and accessibility, enabling faster, data-driven decision-making across downstream systems
